

Wirth Chair Sustainability Series Presents

Dr. Elizabeth Hausler
Founder & CEO of Building Change

Changing Construction Practices in Developing Countries

Join us on **Tuesday, July 10**, when Dr. Elizabeth Hausler will talk about her experience in developing countries with Build Change. Build Change designs earthquake-resistant houses for communities in seismically active countries and trains local builders, homeowners, engineers, and government officials to construct them. Build Change has reached stricken communities in Indonesia, China, and Haiti; trained thousands of local builders, engineers, and students in earthquake resistant building practices thereby improving the housing safety for tens of thousands of people.
